Fax: 208-612-8435

Ducted Air-Source Heat Pump Data Collection Tool

This form can be used to document installation information for homes converting to a ducted air-source heat pump (ASHP) and a ducted variable-speed heat pump (VSHP), or homes upgrading to a ducted VSHP. All sections must be completed by the installer at the time of installation.

Documentation to submit with this form:

- Copy of this completed form
- Purchase receipt or invoice, including the heat pump make and model number
- AHRI Certificate
- If the unit has a variable-speed compressor, include manufacturer documentation that the outdoor compressor includes variable-speed or inverter driven technology (e.g. specification sheet, brochure, or screen shot).
Note: Including the text “variable-speed” on the invoice will not satisfy this requirement. Additional documentation is required.)

Eligibility

- Available for existing single-family and existing manufactured homes
- Heat pumps must be AHRI rated and meet current federal minimum standards for HSPF2 and SEER2
 - *If the unit only has an HSPF and SEER value, please contact the utility for verification of eligibility*
- For a conversion to an ASHP or VSHP, existing heating system type must be an electric forced air furnace, with or without air-conditioning.
- For an upgrade to a VSHP, existing heating system can be a DHP, ASHP, Zonal electric, Wood/Oil/Propane/Gas, or no existing heating
