

OCTOBER 2025

Electric Rate Changes Coming Oct. 1 —With Offset from Power Cost Adjustment

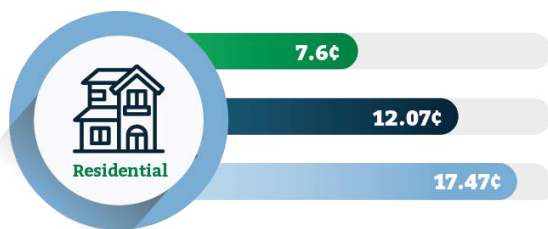

At Idaho Falls Power, our mission remains steady: deliver reliable, affordable electricity to our community. As a not-for-profit municipal utility, we're proud to operate one of the lowest-cost utilities in Idaho and the entire country—without shareholder profits or taxpayer funding. Each year, we evaluate our operations, infrastructure needs, and rising material costs to ensure long-term sustainability. As part of that process, the Idaho Falls City Council approved modest adjustments to electric rates, effective October 1, 2025.

For residential customers, the monthly service charge will increase by \$1.00, and the base energy rate will move from 7.15¢ to 7.60¢ per kilowatt-hour. However, this increase is largely offset by a Power Cost Adjustment (PCA) of -0.50¢/kWh, reducing the net effective rate to 7.10¢. The result? A typical residential customer using 800 kWh per month will see only a \$0.60 increase on their monthly bill. Commercial and industrial customers will see similar minimal changes or, in some cases, a decrease due to the PCA.

The PCA allows us to pass savings associated with wholesale power fluctuations directly to customers. This year, thanks to efficient hydropower production and strategic energy purchases the PCA will reduce the overall impact on your monthly bill.

Idaho Falls Power rates remain well below state and national averages. Our commitment to maintaining low costs, high reliability, and local accountability drives every decision we make. We're also investing in system upgrades, renewable energy, and customer programs

that help you save energy and money. We appreciate your trust and partnership as we continue powering our community together.

New Interactive Hydropower Exhibit at Heritage Park

Idaho Falls Power, in collaboration with INL and the U.S. Department of Energy, has unveiled a new interactive hydropower exhibit at Heritage Park. Nicknamed "The Little Lower," the hands-on model replicates the historic Old Lower Power Plant and lets visitors control water flow to see how hydropower works.

Designed and built with help from BYU-Idaho students, the exhibit blends history, science, and community. Located near the original plant site, it's a tribute to the clean, renewable hydropower that still supplies about one-third of Idaho Falls' energy.

Cedar Point Boat Launch

We're thrilled to announce the opening of the Cedar Point Boat Ramp at the Gem State recreation area on the Snake River! Made possible in part by the Idaho Department of Fish and Game, this improved launch is part of Idaho Falls Power's ongoing effort

to support public recreation along the river and enhance outdoor spaces for our community. Cedar Point offers easy access and another great way to connect with nature right here in our own backyard.

Directions: From U.S. Highway 91, head west on Canyon Road (97th South). Look for signs for the boat launch and Gem State Fishing Pond. Turn north onto the unpaved road and follow it for about 1 mile to the parking lot and ramp.

Celebrating 125 Years of Powering Our Community

October 22nd, Idaho Falls Power

celebrates a monumental

milestone: 125 years

of delivering clean,

reliable and

affordable energy

to our city. From

lighting streetlamps

in 1900 using a

simple canal-based

generator to operating five

hydroelectric plants today, we've

stayed true to our mission: affordable public power.

Over the years, IFP has strengthened our community

by expanding the Idaho Falls Fiber Network, investing

in energy resources, and supporting education.

Thanks to strong leadership, dedicated staff, and

community support, we're proud to power the

city. Here's to 125 years of progress, and many

more years of powering Idaho Falls together!
